

Hypervalent Iodine Reagents

Alfa Aesar offers many of the most useful hypervalent iodine reagents.

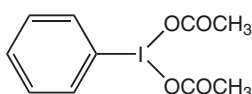

Valuable reagents in synthesis:

- Selective oxidations
- Formation of carbon-carbon bonds
- Functionalization of activated carbons
- Cleavage of protecting groups

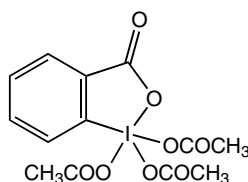

Diphenyliodonium Salts

Catalogue Number	X
A12996	Br
A15149	Cl
A19438	I
B21861	NO ₃
A17934	PF ₆
L17444	CF ₃ SO ₃

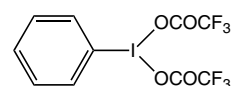

B24531

Iodosobenzene diacetate, 98+%
[3240-34-4]

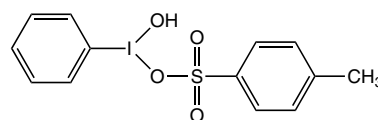

L15779

Dess-Martin periodinane
[87413-09-0]

L15141

[Bis(trifluoroacetoxy)iodo]benzene, 97%
[2712-78-9]

L15701

Hydroxy(tosyloxy)iodobenzene, 97%
[27126-76-7]
